Restoration of State Retirement Contribution Equates to Property Tax Relief

On Wednesday, January 23, at 1:00 p.m., in LOB Room 306, the House Executive Departments and Administration Committee will hear testimony on HB 497, an NHMA policy bill that proposes to reinstate a portion of the state contribution toward the New Hampshire Retirement System (NHRS) costs for teachers, police, and firefighters.

As many of you know, the State of New Hampshire had funded a portion of the retirement costs for teachers, police, and firefighters, a practice that dated back to 1940 under the predecessor retirement systems and continued when these systems were consolidated into the NHRS. Since 1977, the state contribution had been set by statute at 35% of the cost, with municipalities, counties and school districts paying the remaining 65%. (Municipalities, counties and schools paid 100% of the cost for all other employees enrolled in the NHRS.)

The 35% state contribution was gradually lowered from 2010 through 2012 then eliminated entirely, resulting in local governments paying 100% of the retirement costs in 2013 and beyond. This elimination of the state contribution had an immediate impact on property taxes, increasing costs to local governments to pay what had previously been the state share—to an aggregate of approximately $50 million per year. Because the NHRS employer rates have increased since 2013, if the 35% state contribution were still in statute today, local governments would have paid an estimated $90 million less in their 2018 NHRS annual contributions.

HB 497 proposes to reenact a portion of that state contribution beginning July 1, 2019 at 15% of the retirement costs for teachers, police and firefighters. This bill should sound familiar, as it is identical to HB 413 from the 2017 legislative session. HB 413 initially passed the House by an overwhelming majority of 267 to 83, was retained by the House Finance Committee, then lost by four votes (172 to 166) in the 2018 session after a majority of the House Finance Committee recommended killing the bill.

The fiscal note on HB 497 indicates that this bill will relieve local governments of approximately $42 to $43 million annually in retirement costs in
(Retirement Contribution—Continued from Page 1)

fiscal years 2020-2021. Just as the elimination of the state contribution increased property taxes, restoration of a portion of that state contribution will provide property tax relief across the state.

Please let members of the House Executive Departments and Administration Committee know how important a role HB 497 will play in providing much-needed property tax relief. If your state representatives are not on this committee, still make sure HB 497 is on their radar, and urge them to sign in support of this bill at the hearing next Wednesday!

**Town Meeting Postponement**

**HB 408**—NHMA’s policy bill addressing the postponement of town meeting—had its first hearing yesterday. The bill preserves the moderator’s authority to postpone the official ballot voting session, while addressing legitimate issues that have been identified, including the process for absentee voting, a date certain for the postponed election, and consultation by the moderator with other local officials prior to postponing.

About 15 people testified, most of them local officials, including several moderators. Although some who spoke raised concerns about certain aspects of the bill, no one opposed it. Indeed, there appeared to be consensus among all who testified that the determination of whether to postpone should be made at the local level. We are encouraged by what we heard, but there is more work to be done to resolve several issues raised during the hearing.

One issue is whether the bill should include a requirement to notify someone at the state level. The bill currently does not contain such a requirement.

Another involves postponement in towns that are part of multi-town school districts. The bill as submitted would allow postponement even if not all the towns in the district decide to postpone. However, an NHMA-supported amendment was offered at the hearing to allow postponement in multi-town districts only if all towns agree. We acknowledge that this is not a perfect solution, but allowing some towns in the district to postpone, while others do not, would require the non-postponing towns to withhold election results—also an imperfect solution.

The final issue raised is perhaps the most concerning to our members: several people suggested that the postponement of the town elections should be addressed in RSA 669, the town election statute (as well as 670 for village districts and 671 for schools), not in RSA 40, the town meeting statute. We disagree.

The town election is part of, not separate from, the town meeting. The ballot questions considered at the town election are the first articles that appear on the town meeting warrant, and it is RSA 40 that governs town meeting. Further, RSA 669 governs the election of officers on the official ballot—but the election of officers is not the only item voted on at the official ballot voting session. Other questions are voted on the official ballot, most notably zoning amendments. Therefore, authorizing postponement only in the “election statutes” would not allow postponement of the entire voting session.

No decision was made about the bill, but there is a good chance it will be assigned to a subcommittee for consideration of these issues. We will keep you posted.
SAG for Wastewater Projects

On Thursday the House Finance Committee heard testimony on HB 352, an NHMA policy bill, which proposes to appropriate money to the State Aid Grant (SAG) program for 70 completed, or nearly completed, wastewater projects in 35 municipalities across the state. We thank the many legislators and municipal officials who testified or signed in support of this bill. Much of the testimony focused on the need to lift the current moratorium and restore funding for this 20% state grant program, not just for these 70 projects, but for other eligible wastewater projects that will arise in the future.

The bill is scheduled for a work session in the House Finance Committee Division I on Wednesday, January 23, at 10:30 a.m., in LOB Room 212.

NHDES Proposes Water Quality Standards

In accordance with the requirements of Chapter 368, Laws of 2018 (SB 309), the New Hampshire Department of Environmental Services (NHDES), in consultation with the New Hampshire Department of Health and Human Services, recently issued proposed maximum contaminant levels (MCL) for certain perfluorochemicals in drinking water and ambient groundwater as follows:

PFOA..........................38 parts per trillion
PFOS..............................70 parts per trillion
PFOA and PFAS (combined)....70 parts per trillion
PFHxS.........................85 parts per trillion
PFNA.........................23 parts per trillion

Accompanying the proposed standards was an extensive report documenting how NHDES arrived at these recommended levels. The report indicates that NHDES calculated these proposed health-protective levels using the science-based process as both the drinking water standard and the ambient groundwater standards, without adjustments based on detection and treatment technology or projected compliance costs. While unable to analyze costs in keeping with federal Environmental Protection Agency and Office of Management and Budget guidance, the report nevertheless includes estimated costs for public water systems to comply with the proposed standards based on existing sampling data available to NHDES. Click here for a copy of the Summary Report on the NH Department of Environmental Services Development of Maximum Contaminant Levels and Ambient Groundwater Quality Standards.

Public hearings on the administrative rules regarding the proposed MCLs will occur in southern New Hampshire, at Pease Tradeport, and at the NHDES offices in Concord in early March, which provides time to review the proposal and companion report. Depending on the comments received, it is anticipated that the final administrative rule proposals will be filed by summer. The effective date of the new rules has yet to be determined. Once adopted, these administrative rules will have the effect of law.

Please share this information with municipal officials involved with water and wastewater operations in your municipality and advise us of concerns regarding these proposed standards.
Motor Vehicle Registration Fine

**HB 563**, an NHMA policy bill, proposes to raise the fine for failure to properly register a motor vehicle. The fine for this violation shall be $100 *per day* that the violation occurs (as opposed to the current one-time $100 fine) unless reduced by the director of the Division of Motor Vehicles for good cause. **HB 563** is scheduled for a hearing in the House Ways and Means Committee on Thursday, January 24, at 11:00 a.m., in LOB Room 202.

Registration of Motor Vehicles

**SB 37** modifies the length of time from “exclusively” to “for 6 months or more” that a nonresident must garage a vehicle in New Hampshire in order to qualify the vehicle for nonresident registration. There is no statement on this bill indicating the potential fiscal impact on state or municipal motor vehicle registration revenue. A hearing on **SB 37** is scheduled for Tuesday, January 22 at 1:00 p.m. in LOB room 103 before the Senate Transportation Committee.

Exemption from Timber Tax

**HB 206** proposes to exempt owners and occupiers of residential land not in current use from the 10% timber tax assessed under RSA 79-A. While an exact fiscal impact cannot be estimated, such an exemption will obviously reduce the amount of timber tax revenue assessed and collected by municipalities. A hearing on **HB 206** is scheduled for Tuesday, January 22, at 1:30 p.m., in LOB Room 301, before the House Municipal and County Government Committee.
