NHMA Bill to Full Senate

The Senate Public & Municipal Affairs Committee voted 3-2 this week to recommend killing [SB 78](#), the bill that, as introduced, seeks to define the New Hampshire Municipal Association, mandate rules for its board of directors, and impose additional restrictions on its lobbying activities. The recommendation of Inexpedient to Legislate will go to the full Senate next **Thursday, February 14.**

The two senators who voted against the ITL motion wanted instead to pass an amended version of the bill. The amended version, which we expect will be offered as an alternative to the ITL motion next week, would delete almost all of the original bill and instead make a simple amendment to RSA 31:8-a. That statute currently reads as follows:

31:8-a Authorization to Pay Dues. – The board of selectmen may vote to pay, from amounts appropriated by the town for town officers' expenses, such amounts as shall be payable for annual membership in the New Hampshire Municipal Association and expenses incurred in attending regular meetings of the said association, provided that the appropriation of such dues has not previously been rejected by a vote at the annual town meeting and provided further that the association shall not record association positions before the general court or committees thereof on matters which do not directly affect New Hampshire towns and cities, nor engage in partisan political activity by endorsing, or otherwise supporting, any political party or candidate.

The proposed amendment would merely delete the words “the New Hampshire Municipal Association” and replace them with “a nonprofit, nonpartisan membership organization of towns and cities,” and replace the word “association” with “organization” in each place it appears. Thus, it would make no substantive change at all to the existing statute, because NHMA already *is* “a nonprofit, nonpartisan membership organization of towns and cities.”

NHMA Bill - continued

That seems harmless enough, but if the bill would not change anything, what is the point? Further, even if it passes the Senate in this seemingly harmless form, it could be further amended in the House, and there is no telling how it would end.

SB 78 is obviously not needed, and its existence in any form is an objectionable intrusion into municipal authority. Please urge your senator to vote to **kill SB 78** next week.

Senate to Hear Bill on Burning Lumber at Transfer Stations

The Senate Energy & Natural Resources Committee will hear testimony next week on **SB 31**, an **NHMA policy bill** that would make permanent the exemption that allows municipal transfer stations to burn incidental amounts of untreated waste lumber.

In 2007 the legislature enacted a ban on the combustion of the wood component of construction and demolition debris. This was in reaction to concerns about commercial enterprises burning large amounts of treated lumber, because of the lead, mercury, and other pollutants released by the combustion. However, the ban as enacted includes all C&D lumber, including untreated wood, wherever it is burned. This could apply even to the small amounts of untreated wood that are burned on the “burn piles” at municipal transfer stations.

To avoid the expense this would have created for municipalities—they would have to pay to have the lumber disposed of in some other manner—the 2007 legislation included an exception for “the incidental combustion, under the supervision of a solid waste facility operator, of untreated wood at any municipal transfer station.” That exception was originally scheduled to expire on January 1, 2011, but it was later extended to January 1, 2014. Thus, if no further action is taken, the transfer station exemption will expire at the end of this year.

We understand that the original reason for not making the exemption permanent was a concern about a potential constitutional challenge to the statute by out-of-state C&D combustion companies based on Commerce Clause arguments—a little complex for this publication. In any event, that challenge was indeed made, and the state prevailed, so we understand that this concern no longer exists.

In other words, it is now time to make the municipal exemption permanent, and **SB 31** would do that. We do not anticipate any opposition to this bill, but if this issue is important to your municipality, please let your senator know about it. The hearing is scheduled for **Wednesday, February 13, at 9:00 a.m., in LOB Room 101.**

Bill Would Change Meals and Rooms Tax Distribution Formula

SB 121 proposes to change the formula used in the meals and rooms tax distribution to municipalities. Under current law, the formula is based solely on population—that is, each municipality’s population as a percentage of the total state population, based on the latest resident population figures provided by the Office of Energy and Planning. The new formula would apportion 44 percent of the total amount to be distributed (currently \$58.8 million) based upon the proportion of meals and rooms tax revenue collected in each municipality, with the remaining 56 percent distributed based upon population. It is our understanding that the Department of Revenue Administration does not have, and/or cannot release under its confidentiality statutes, data necessary to compute the impact this proposed change would have on each municipality. ***NHMA is taking no position on this bill.*** The hearing on **SB 121** is scheduled before the Senate Ways and Means committee on **Tuesday, February 12, at 9:15 a.m. in State House Room 103.**

Retirement Bills

On Wednesday of this week, the Senate Executive Departments and Administration committee heard testimony on **SB 132**, dealing with part-time employment of New Hampshire Retirement System (NHRS) retirees. This bill removes the current limitation of “32 hours in each normal calendar week,” and replaces it with 1,600 hours in a calendar year, which averages out to approximately 30 hours per week. That change would provide greater flexibility in terms of week-to-week scheduling demands. While NHMA and representatives of schools boards and counties supported the bill, representatives of labor opposed the bill, stating that part-time employment of retirees increases the unfunded liabilities of the NHRS, a fact not supported by the fiscal note on this bill.

Several other retirement bills have hearings next week:

HB 342, another bill dealing with part-time employment of retirees, is scheduled for a hearing before the House Executive Departments and Administration committee on **Thursday, February 14, at 1:15 p.m., in LOB Room 306.** This bill changes the number of hours a retiree can work in a part-time position from 32 to 24 in a normal calendar week. It also requires that if a retiree works more than 24 hours but fewer than the number of hours required for active membership participation in the NHRS, then the employer will pay the unfunded liability portion of the NHRS employer contribution rate on the amount of compensation paid to that retiree. Finally, the bill requires that employers provide written notice of the rules on hourly limitations to a prospective employee who is a retired member of the NHRS.

HB 364, another bill requiring employers to notify prospective part-time employees of the limitations on part-time employment, is scheduled for a hearing on **Tuesday, February 12, at 11:00 a.m., in LOB Room 306**, again before the House Executive Departments and Administration Committee.

Retirement Bills - continued

If you have concerns about the part-time employment of NHRS retirees, please contact members of the Senate Executive Departments and Administration committee and express *support* for **SB 132**, and contact members of the House Executive Departments and Administration committee in *opposition* to **HB 342** and **HB 364**.

Finally, **HB 620** proposes to have both the employers' and employees' retirement contribution rates adjusted to share equally in any changes (increases or decreases) in the unfunded accrued liability as determined after each NHRS actuarial valuation. This bill is scheduled for a hearing before the House Executive Departments and Administration committee on **Thursday, February 14 at 2:00 p.m., in LOB Room 306**.

Members Support Restored Funding for Environmental Grants

On Thursday over 30 municipal officials and other supporters assembled at the House Finance Committee to testify in support of **HB 623**, an **NHMA policy bill** that seeks to restore funding for the environmental state aid grant (SAG) program. This advocacy effort paid off as the chairman of Division I (which handles DES's budget) indicated in his brief testimony to the full committee that funding for the SAG program would be a "top priority" for his division.

Historically, the legislature has supported municipal wastewater, public drinking water, and landfill closure projects through the SAG program administered by the New Hampshire Department of Environmental Services. This program allows municipalities to receive state assistance of 20 to 30 percent toward principal and interest payments on eligible and completed water infrastructure projects.

Since October 2008, the legislature has deferred most appropriations to the SAG program, resulting in 127 eligible projects not receiving any funding in fiscal years 2009- 2012. Municipalities were left with a heavy burden to pay the state's proportionate share of these mandated infrastructure improvements. As Jaffrey Selectman Don MacIsaac stated in his testimony, the state's proportionate share of \$6 million owed to the town for its \$18 million wastewater treatment plant approved by town voters in 2007 "represents the cost of four new town halls."

This backlog of municipal projects, affecting 60 municipal and other entities, includes 103 wastewater projects totaling \$47.7 million; 16 public water supply projects totaling more than \$3.8 million; and eight landfill projects totaling more than \$1 million in grant requests. The current list of "delayed and deferred" projects now totals \$52.6 million. These numbers differ slightly from previously-reported numbers as a result of DES's testimony to the committee and represent the most up-to-date financial obligations owed to cities and towns under existing statutory criteria.

Environmental Grants - continued

Municipal officials from Exeter, Manchester, Keene, Dover, Portsmouth, Amherst, Conway, Holderness, Jaffrey, North Conway Water Precinct, and Peterborough all testified in support of **HB 623**, while officials from Franklin, Newmarket, Tilton and the Lower Bartlett Water Precinct attended but did not testify, and written testimony was offered from Auburn, Franklin, Tilton, and Nashua. Many other organizations and officials offered oral or written testimony in support of the bill. No one opposed it.

Bi-partisan legislative support came from many senators and representatives. NHMA wishes to thank all our members, legislators, and industry, professional, and environmental groups for their support on **HB 623**.

Most of these infrastructure investments are required by Federal and/or state law, and cities and towns will continue to expend significant monies in the future to comply with regulations under the Federal Clean Water Act and the Safe Drinking Water Act. Several members, including officials from Portsmouth, Exeter, and Dover, discussed the need to maintain this program to offset future costs for new wastewater treatment plants in the Seacoast region to meet new nitrogen discharge limits imposed by the EPA.

Local government officials and citizens alike have long relied on the state's commitment to this funding partnership, which was created by the Legislature in 1959 to make environmental investments at the local level more affordable. A letter of support from the Auburn Board of Selectman summarizes the issue perfectly: *"We certainly understand these have been difficult times we are living in, and all of our public sector agencies, departments and communities have been asked to do more with less. But when local decisions are made based on existing state law and historical precedence, we strongly encourage the Legislature to adhere to the legal and policy decisions it has made and provide funding for those delay and deferred communities."*

Policy Bills Advance in Senate

Four **NHMA policy bills** will go to the Senate floor next week, all with favorable recommendations. They are:

- **SB 11**, which allows municipalities to establish water resources utility districts and to enter into inter-municipal agreements for the establishment of such districts;
- **SB 49**, which modifies the procedure for appealing planning board decisions to the zoning board of adjustment and the superior court;
- **SB 58**, which allows a municipality holding water works or flood control land in another municipality to enter into a voluntary agreement with the host municipality for payments in lieu of taxes; and

Policy Bills - continued

- **SB 64**, which changes the public notification requirements for the breaching of a dam or lowering of a water body.

All four bills are on the Senate's consent calendars with 5-0 recommendations for passage.

Understanding the Equalization Process and the Impact on County Taxes — An Informational Session for Municipal, County and State Officials from Cheshire County

The New Hampshire Municipal Association and Cheshire County are offering an informational session for Cheshire County municipal, county, and state officials to help in understanding the equalization process and how it affects shared property taxes, particularly county taxes. This presentation by the Department of Revenue Administration (DRA) is designed to provide easy-to-understand information about how local property taxes are calculated in light of lower property values and shrinking or level budgets. Click [here](#) for more information and registration.

Note: This session is limited to municipal, county and state officials from Cheshire County. Similar presentations may be offered in the future for officials from other counties.

New Discussion Group for Supervisors of the Checklist

After the great success of the NH Moderators e-mail discussion group, the New Hampshire Municipal Association (NHMA) has received several requests to set up a similar group for supervisors of the checklist. This will be a simple way for supervisors to communicate with one another by e-mail about matters related to the position.

If you have not received an invitation and would like to join, please contact Erica Johnson at ejohnson@nhlgc.org. We hope you will join the group and find it to be a helpful tool for New Hampshire supervisors of the checklist to discuss issues, ask questions, and share information about any aspect of the position.
